

Contains  
dextrose

# Re-hydralab

Complementary feed in oral solution

## Quick recovery from dehydration

- ✓ Excellent results in young animals
- ✓ Aids in recovery of homeostasis and stabilises the water and electrolytic balance
- ✓ Aids in overcoming thermal stress

## Complete formula with electrolytes and sugars

- ✓ With dextrose
- ✓ Contains sodium & potassium salts
- ✓ Contains sodium and potassium salts.
- ✓ The addition of dextrose supports the absorption of sodium and water in the intestine<sup>1</sup>

## Convenience of use

- ✓ Several sizes: 1 l and 5 l
- ✓ The animals accept it very well
- ✓ Does not precipitate: does not obstruct drinking troughs

**LABIANA**  
*always works*

## Sodium and potassium, responsables of electrolyte balance

### Sodium

- Regulation of blood pressure and of blood volume.

### Potassium

- Essential for correct growth of the organism.
- Intervenes in the production of proteins with its main components which are amino acids.
- Intervenes in the metabolism of carbohydrates.

The addition of dextrose to the electrolyte solution increases the absorption of sodium in the small intestine.

### Sodium and potassium

- Regulate the concentration of substances inside and outside the cells.
- Collaborate in the permeability of the membranes.
- Form part of the bones.
- Participate in muscular contraction.
- Intervene in nerve transmission and in the correct functioning of the nerves.

## COMPOSITION

Dextrose, sodium chloride, monopotassium phosphate, potassium salt of citric acid.

### Additives per liter:

#### Flavouring:

Glycine (2b17034) ..... 38.50 g

#### Preservatives:

Potassium sorbate (E202) ..... 1.50 g

#### Colourants:

Caramel coloring (E150d) ..... 0.60 g

Flavouring mixture ..... 0.44 g

### Analytical composition:

Sodium ..... 34 mg / kg

Potassium ..... 18853 mg / kg

Chlorides ..... 4.79%

Lysine ..... <0.02%

Methionine ..... <0.02%

Crude protein ..... 4.11%

Crude oils and fats ..... 0.02%

Crude ash ..... 6.68%

Crude fibre ..... 0%

Citrates ..... 430 mg / kg

Sources of carbohydrates ..... 21.48%

Insoluble P in 2% citric acid ..... 1.15%

Total phosphorus ..... 0.03%

## INDICATIONS

Source of energy and electrolytes.

## DOSAGE AND ADMINISTRATION

Oral administration, in drinking water.

From 1 to 7 days.

**Calves:** 40-50 ml/litre of drinking water. 2 litres/day.

**Lambs, kids and piglets:** 60 ml/litre of drinking water. 0.5-1 litre/day.

**Poultry:** 1-2 ml/litre of drinking water.

**Foals:** 50 ml/litre of drinking water. 3 litres/day.

## SPECIAL PRECAUTIONS FOR STORAGE

Store in a cool and dry place. Protect it from the light.

Shelf life: 2 years.

## PRESENTATIONS

200 ml and 1 litre bottles.

5 litre jug.
